Software Developer

NeoTreks, Inc Prague, Czechia (Remote)

Are you enthusiastic about information technology and would you like to participate in a development of something new? Do you enjoy working with modern technologies? If so, don't hesitate and let us know about yourself.

We are a fast growing US company that has been developing and delivering software and software services for clients in the US for over 10 years. Even though we are a US company most of our developers live and work in Czechia.

We engage with prominent companies in the US, in both the private and public sphere. For example, Ford Motor Company, Skullcandy, and Wyoming Department of Transportation.
We welcome a new member to our team.
The position is also suitable for students/graduates.

What job duties can you expect for this position?

- Programming, software design and development
- Client/server or mobile application development
- Improving software components and services
- Cooperation with senior programmers and willingness to learn from them.
- Modern procedures and automation of development activities
- Backend development Kotlin/SpringBoot, frontend development TypeScript/Angular or mobile development Android/Kotlin.

What do we expect from our developers?

- Ability to meet in person in the Prague office according to your needs.
- Finished or ongoing university education in IT.
- Own GIT, where we can look at past projects or links to projects on the Internet.
- Communication in English language.
- Interest in software and IT – enthusiasm, innovative thinking
- Initiative and willing to learn
- Ability to work in a team
- Independence, consistency, precision, reliability, structure

What can you expect from NeoTreks?

- Work side-by-side with skilled senior developers.
- Competitive salary
- Flexible working hours
- Self-employment – freelancer
- Direct contract with NeoTreks Inc., without any agency
- Simple interview process with the management team
- Support of self-realization and application of knowledge
- Fast professional growth
